RTI – RESPONSE TO INTERVENTION

SAMPLE MODEL

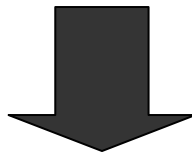

Step One

Use clear criteria to screen students to determine if performance is below grade level expectations.

Step Two

If the student is below grade level expectations, initiate scientifically-based instruction, closely monitored by the student's teachers.

Step Three

Over time, if the student fails to respond to Instruction and interventions, consider more Individualized evaluations to determine why.

Does the student need more intensive interventions?
Does the student need special education services?
